

# wallbox

## Unlocking the power of EV Charging

## We are Wallbox

We are dedicated to **unblocking the adoption of electric vehicles (EVs)** today and **unlocking the possibilities of more sustainable energy use** tomorrow through smarter, simpler charging and energy management solutions for all.

We build smart charging systems that combine **state-of-the-art technology** with **exceptional design**, creating an intelligent ecosystem between car, charger, energy grid and smart devices.

### Why Wallbox?

WE ARE PRESENT IN MORE THAN  
**100 COUNTRIES** IN ALL CONTINENTS

HQ in Barcelona (Spain)  
Production plants in Barcelona,  
Shuzou (China) and Texas (USA) (Sept'22)

WE ARE RECOGNIZED BY THE  
**MOST PRESTIGIOUS AWARDS**

WE ARE TRUSTED BY LEADING  
BRANDS IN THE INDUSTRY

WE HAVE SUCCESS CASES  
ACROSS THE GLOBE

REPLENISHH

"We chose Wallbox for the innovation—its ability to be flexible in this ever-evolving market. Wallbox has evolved in such a short space of time."

*Jim Rugg, EV Technical and Specifications  
Manager of Replenishh (UK)*

## We offer a complete solution for EV charging

We have  
the **hardware**

A full range of chargers and accessories to choose from, with innovation and design at the core.

We have  
the **software**

Software solutions that allow full control over all chargers.

We have **advanced energy management features**

Features that improve our charger's intelligence to manage the power in the most efficient way.

**All backed by Wallbox services**

## Our solutions are

### Scalable

Easily connect and control multiple chargers.

### Compatible

Available in a variety of charging cables and power supplies to meet any evs and installation needs.

### Durable

Designed and manufactured in europe, our chargers are built to last and are covered by Wallbox's 3 year warranty.

### Powerful

With up to 22 kw, experience a charge that's up to 8x faster than a standard charger.

### Efficient

Customise the charger's energy consumption with our load management solutions so you don't exceed your premise's power capacity and avoid unexpectedly high energy costs.

### Connected

Different connectivity options allow full control of our chargers from any computer or smart device.

# PULSAR PLUS

## Small is powerful.

### Compact and powerful

Up to 22 kW of charging capacity while weighing just 1kg.

### Connected

Connect Pulsar Plus to any smart device via Wi-Fi or Bluetooth and use the myWallbox app to easily control your charger.

### Controllable

Access a full range of functionalities on the myWallbox app. Pulsar Plus is also compatible with OCPP platforms.

### Onboard Intelligence

Don't worry about connectivity blackspots in your garage or parking spot. By using bluetooth, Pulsar Plus lets you manage your charge even when you can't connect to the internet.

## COMMANDER 2

### Shared charging made easy.

#### Easy to use

The built-in touchscreen makes it easy to unlock and choose charge settings.

#### Easy to share

Secure shared access with password protection, RFID cards, or the myWallbox app.

#### Connected

Connects to any smart device via Wi-Fi, Bluetooth, Ethernet, or 4G (optional).

#### Controllable

Use the myWallbox platform to control multiple chargers and users, access our energy management solutions, benefit from our integrated payment system, and more.

#### Power Sharing

Connect two or more chargers to the same electrical circuit. Commander 2 integrated software intelligence automatically balances the power distribution across all connected chargers based on each vehicle's need for power, providing optimal charge to all EVs at the same time.

#### myWallbox Business Plan (included)

Manage chargers, users and payments through an all-in-one cloud platform. Users of your chargers can easily access and pay for your charge services on the myWallbox app and you'll get paid directly into your bank account. Choose the payment configuration that best suits your needs and we'll take care of the payment flows!

## COPPER SB

### Versatility is beautiful.

#### Flexible

Its integrated socket allows charging for any EV on the market.

#### Easy to share

Secure shared access with password protection, RFID cards, or the myWallbox app.

#### Connected

Connects to any smart device via Wi-Fi, Bluetooth, Ethernet, or 4G (optional).

#### Controllable

Use the myWallbox platform to control multiple chargers and users, access our energy management solutions, benefit from our integrated payment system, and more.

#### Power Sharing

Connect two or more chargers to the same electrical circuit. Copper SB integrated software intelligence automatically balances the power distribution across all connected chargers based on each vehicle's need for power, providing optimal charge to all EVs at the same time.

## Meet myWallbox, our intelligent software

**myWallbox** is the software platform that allows full control over your Wallbox chargers. By exchanging data with your smart charger, your electric vehicle and the grid, it helps you manage your **charging energy consumption** in the most efficient way.

### One cloud, different ways to access our chargers

#### myWallbox app allows you to:

- Manage charging and monitor the charge status
- Set and change **charging schedules** to benefit from off-peak energy rates
- **Remote** locking and unlocking
- Check real-time charging **statistics**
- Receive real-time **notifications**
- Execute over the air **updates**

#### myWallbox portal allows you to:

- Manage **multiple users** of your Wallbox chargers
- Manage **multiple chargers** in different locations
- Access real-time **status and statistics**
- Execute remote **firmware updates**
- Provide **users access** to your Wallbox chargers through the app
- Customise **payment configurations** for access to your chargers

# Introducing Eco-Smart Solar EV Charging

## Greener charges at your fingertips

Eco-Smart is an embedded smart feature that enables EV charging with the green energy generated from your solar panels (PV) or wind turbines—at no additional cost. Enjoy a more sustainable, more efficient charge everytime you plug in!\*

### Two modes for greater control

Charge with 100% solar energy or a mix of solar and grid energy.

### Harness the full power of your PV

Take advantage of every bit of energy surplus by directing that excess clean energy to your car.

### More green, more savings

Save even more on your electricity bill by using the free, clean energy that's already yours.

## Two modes to choose from

Choose your preference with just one click in the myWallbox app and change your selection at any time.

### Full-Green Mode

Full-Green mode detects when there is enough surplus green energy available at your home to meet the minimum requirements needed to power your car. That's when your car will begin charging, meaning every charge is 100% green.

### Eco Mode

Eco mode detects the surplus green energy that is not being used elsewhere in your home in real-time and mixes it with energy from the grid to ensure a fast, efficient charge. This minimizes your use of grid energy.

*Compatible with Pulsar Plus, Copper SB and Commander 2. Energy meter required.*

wallbox 

## Enhance your smart EV charger's features

Get the most from every charge with our range of charging accessories. Designed to work seamlessly with your Wallbox charger, our accessories allow you to customise your charging system to best suit you. From energy meters to charging cables, we have everything you need to start charging your way.

### ENERGY METERS FOR DYNAMIC LOAD BALANCING

Wallbox dynamic load balancing solutions will improve your chargers' intelligence to avoid blackouts and costly energy bills. Combining your smart charger with an energy meter, will allow you to monitor the amount of live energy being used in your house or building. It will then automatically adjust the charging power it delivers to your car, in accordance with your local grid capacity. Choose the power meter that best suits your installation needs and enjoy automatic control of your energy consumption:
